Research shows that data-driven teacher collaboration produces robust gains in student learning. However, your data teams, like many, still seem to struggle with these three dilemmas: committee without community, time without tools, and data without deliberation.

The two-day training, Got Data? Now What?, presents powerful principles, field-tested strategies, and practical tools for using data to focus group conversations.

Presented by the author of “Got Data? Now What?” this session will help your data teams identify what’s relevant to talk about and transform struggling groups into powerful communities of learners!

• Learn to guide your teams in data-driven problem solving and decision-making to drive continuous improvements in student learning.

• Discover practical methods for using data to focus conversations and increase team productivity.

• Learn to efficiently get work done while developing capacity for doing increasingly complex tasks.

Your Presenter:

Laura Lipton, EdD, is an international consultant whose writing, research, and seminars focus on effective and innovative instructional practices and on building professional and organizational capacities for enhanced learning.

May 6-7, 2014
8:30 a.m. - 4:30 p.m.
