Evaluation Comments

Excellent workshop!

Great hands on PD.

Great ideas for implementing STEM in the classroom.

Great sessions!

I enjoyed the hands-on learning activities for the early childhood population. Most workshops don't focus on early childhood so it was good to see new ideas for this area.

I enjoyed the sessions I attended at the Summit.

I enjoyed the various presenters and vendors that were available to offer many resources across all grade levels.

I love the STEM Summits. I always walk away with something new for my classroom and students. Thanks for making it a great workshop.

I loved that I was able to see different workshops by some of our local teachers!

Learned a lot of new skills to take back to my teachers and team.

Many of the sessions were excellent but I felt they were a bit rushed.

TERRific CONFERENCE!!

Thank you I look forward to next years summt!

The sessions were excellent. Each of the sessions I attended were relevant and practical.

This was my first time attending a workshop and I feel i got more than enough resources/information than I was expecting. Most, if not all, presentations had something I can see myself implementing in my classroom.
