

TEXAS STUDENT DATA SYSTEM OVERVIEW

JAMES MENDOZA, REGION ONE ESC

October 18, 2013

Introducing the Texas Student Data System

A data collection and reporting system that will:

- Modernize the PEIMS data collection process to **reduce technology risk and system downtime**, allowing for more system availability and ease of use, and;
- Put **real-time student performance data** in the hands of educators to improve student achievement, and;
- Become the **common data collection platform** for TEA to reduce the data collection burden on districts and charter schools.

How will TSDS work?
