### NEW ISSUES

COMPONENT	IMPACT	ISSUE	REPORTED DATE	RELEASE DATE
Core	Request Submission Extensions	<p>When entering an extension request, the request will apply to the data collection and submission that is selected in the blue context header at the top of the Core application, rather than the submission selected on the Request Submission Extensions screen.</p> <p>This may result in entering a request for the wrong submission, if it is not the one selected in the header. Additionally, once the request has been submitted, the submission information does not display in the request history at the bottom of the screen, so the user is unable to see that they've submitted a request for the wrong submission. TEA will reject any invalid request submitted.</p> <p>Currently, this issue only affects Class Roster and ECDS, as they have multiple submissions. Please be sure the LEA has selected the correct collection and submission in the header before submitting their extension request.</p>	04/28/20	05/29/20
Core	Status History screen	When sorting the Updated Date column in ascending or descending order, the year is not used to determine the order. Example, 12/31/19 is listed before 1/1/20 when sorting in descending order.	05/01/20	TBD
PEIMS	<b>42400-0031</b> SUMR	Rule 42400-0031 is firing when reporting period 4 has NUMBER-DAYS-TAUGHT greater than 45. For 2019-2020, the rule will only check reporting periods 1-3 to ensure that NUMBER-DAYS-TAUGHT is not greater than 45.	04/29/20	05/29/20
PEIMS	<b>42400-0035</b> SUMR	Fatal rule 42400-0035 is firing for each six-week period where the sum of TOTAL-ELIGIBLE-DAYS-PRESENT and TOTAL-INELIGIBLE-DAYS-PRESENT equals 0 for a student. The rule should be looking at the entire school year and not a six-week period.	04/20/20	05/29/20

PEIMS	Bilingual ESL Funding Code	If a student changes their Bilingual ESL funding code within a six-week period, the LEA will receive a fatal error when promoting the data. Students should be able to change their Bilingual ESL funding code within a six-week period.	04/20/20	05/29/20

All student data will need to be re-loaded.	**
