

# T-TESS APPRAISER CALIBRATION

PRACTICE ENSURES VALIDITY AND RELIABILITY

## ABOUT THIS WORKSHOP

### Why does calibration matter?

The T-TESS Calibration Training is designed to provide participants with a deeper dive into the calibration process, allowing them to engage in multiple calibration opportunities using two different rubrics. These sessions provide participants with an opportunity to hone in on scripting and evidence collecting skill sets.

This half-day training will support appraisers in strong calibration practices between evaluation and rating rubrics. It will also provide aligned support to Teacher Incentive Allotment (TIA) cohorts with Success Factor Four: Strongly Calibrated Teacher Observation System.

## WHAT TO EXPECT

Deeper dive into the calibration process

Engage in calibration opportunities using a rubric and two different protocols

Hone our scripting and evidence collecting skill sets

**COMING SUMMER 2022**
