

Region One ECI Available Trainings for Child Care Centers

The Health and Human Services Commission (HHSC) Early Childhood Intervention (ECI) program has collaborated with the Texas Workforce Commission (TWC) to obtain funds that will be used to support early child development training needs in child care centers in specific areas of the state including Brownsville and Edinburg.

ECI programs will present HHSC's *All Together Now* or *Building Stronger Brain Foundations*, and/or one of their own trainings on the following topics:

- The impact of positive and negative experiences on brain development;
- The importance of early intervention and evidence-based practices used in early intervention;
- Classroom strategies to foster healthy brain development and classroom interventions to create an inclusive classroom;
- Activities to enhance multiple developmental areas and information on developmental red flags; or
- Strategies for discussing developmental concerns with parents.

These trainings will qualify for continuing education units (CEU) for child care staff and certificates will be obtained through the Texas Early Childhood Professional Development System (TECPDS).

To schedule a training or request brochures about our program, please contact:

Gabriel Gonzalez, Child Find Specialist (Cameron County)
