

# Staying on Course, Calm & Connected!

## GEARUP Teacher Staff Development

UTRGV™

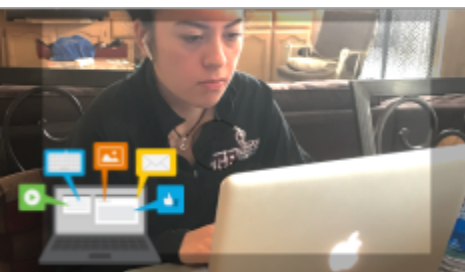

GEAR UP  
College in ACTION!

During this time of adaptation and resilience, the **UTRGV GEARUP** program is excited to invite our 2020 GEARUP math & science teachers to the following learning opportunities. We have partnered with the Region One STEM Center to showcase leading, innovative solutions to help you bridge your instructional talents with new and exciting tools, strategies, and activities. Register today and reserve your slot for the following sessions.

*Stay on course, calm, and connected!*

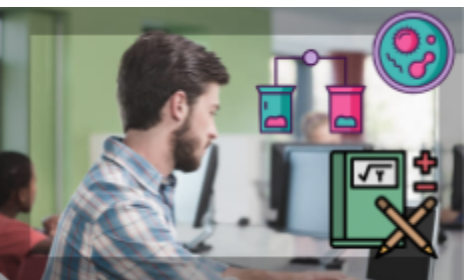

### WS 149133 Teacher Capacity Building: Remote Summer Camps

At no other time is it more important to remain connected with your students. Join us to learn creative ways to bring your content to their screens. The session will feature 4 mini-modules covering topics in 1) Digital Citizenship 2) Digital Escape Rooms 3) STEM-based project ideas, and 4) student-based ePortfolios. Each module will include topics related to the recent COVID experience with embedded student products. The session will be delivered as an online workshop.

### WS 149134 Math & Science Deep-Dive with Project-Based Learning

Deep and meaningful learning is a result of carefully planned lessons that connect content and concepts to student's everyday lives. As a pedagogical approach, *Project-Based Learning* is a proven method for teaching and learning. Join other educators as we explore the recent COVID experience with math and science student products. Register today to gain an over of PBL with a modelled deep-dive into math and science connections thru the eyes of a student.
